

Sunita Agarwal ALM'13

I am a scholar with a Masters in Commerce '15 from Mumbai University and a Masters of Liberal Arts, Management '13 from Harvard University. Additionally, I have two-year Diplomas in both the oldest science, Astrology, and in the latest technology, Computer Science.

I have a two-fold aim - to form the HEAA India chapter as well as to create more activity in the Asia Pacific region via social media. As networking is one of my strengths, I believe I can further Harvard's legacy and deepen alumni ties domestically and internationally.

I had represented Harvard Club of India as its Treasurer at the recent "Asia Pacific Club, Contact, and SIG Leaders Meeting" in Singapore on March 18 & 19, 2017 followed by "Your Harvard" reception with President Drew Faust, and I hope to share and implement all that I have learnt through these events.

I am blessed to be a Harvard Graduate; thus, my moon shot aim is to be the change agent, who can enable international students to obtain visas for HES, thereby increasing HEAA's presence globally.

I have developed communication for Environmental Leadership Program (USA) and Shankara (India), both not-for-profit organizations under Dr. Frank White's tutelage, through the real and virtual world mediums; I am sure these skills would benefit the HEAA.

One of my strengths is virtual team management, inculcated through Dr. Myra White's course at Harvard; thus, virtual connectivity is a strength living across the globe.

It would be a privilege to serve as an HEAA committee member and I look forward to this opportunity to fulfill my aspirations.

My husband Lalit and my son Yashovardhan both support me in my endeavor to join the HEAA.
