

Amjad "MJ" Faqouseh ALB '16

I graduated with my bachelors in Government and finishing my Masters in International Relations by 2018. I have an extensive background in government as well as intelligence, national security, homeland security, international security, cyberwarfare, and diplomacy. I have also completed a multitude of degrees from Florida as well as an extensive amount of classes ranging from all fields from physics to history and so on. I have also been involved in numerous businesses including real estate, diamonds, arbitrage, micro-business, NGO's and applications. I am also a pilot, a deep sea diver, I love extreme sports and adventure! I had also written the Constitution and Bylaws for the Harvard Graduate Council (HGC) serving within the Executive Board for the Chair of Governance.

I believe with my background and involvement with businesses, school clubs, and understanding of organizations, the team of HEAA and I will create fresh ideas, different perspectives, various backgrounds, insightful information, and a driven attitude towards everything we do. This will not only allow for a sustainable way of maintaining relations with Alumni members, but also seek to allow future alumni members to be involved. I also believe that the way of perpetually growing is to continuously reach out and hear different ideas allowing for growth, activity, and prosperity.

I hope to accomplish a simple yet effective plan, and that is to allow HEAA to be well known amongst student at Harvard whilst influencing future students to actively get involved with current and future projects. With this plan, HEAA will be able to have a reach further than it already has, and more importantly have more involvement and activity amongst current and future alumni. This opens the door for interaction, ideas, prosperity, and mostly importantly...purpose.
