

## **Jason Land ALM '16**

Hello! I recently completed my MA in Finance from the Extension school in 2016 and am excited to lend my energy to building a stronger network among alumni across the globe. As a “military brat” raised around the world, an extension student that moved to Boston to complete residency, and later completed my degree remotely, I fully embrace the challenges of distance learning programs faced by many Extension school students. I firmly believe one of the most significant value propositions of our school is the potential to meet talented and driven people from a variety of backgrounds, and hope to better bridge opportunities for us to connect.

As such, I intend to develop more opportunities for alumni to meet locally in major hub locations and listen to your needs in what format those programs take. In addition to expanding our programs in existing cities, I will also identify additional locations with growing alumni populations to add to our networking events.

Why should you vote for me? I make it a habit to keep commitments I make. I have experience managing and driving results in a corporate environment, including my current role driving a predictive analytics at Verizon, and past experience in strategy at Liberty Mutual, HP, and KPMG. In addition to my career, I’ve also served the community on several boards and volunteering for numerous organizations focused on literacy, education, and the environment. I have a MBA from the University of Dallas and bachelors in History from University of Texas at Dallas. I enjoy a wide range of hobbies, including running, cycling, hiking, adventurous travel, and meeting new people that want to make an impact. Thank you for your vote as Director of Regional Engagement and I look forward to meeting all of you!
