

Stan Rajan ALM '12

Stan Rajan is a versatile leader with a proven track record of success in leveraging technology and data to deliver business value. Stan is currently the Director of Corporate Functions Technology at CIT Group, a leading provider of financing, leasing, and advisory services to small to middle-market businesses across a wide variety of industries. Stan provides leadership to drive innovation and the continued development of a robust, and secure information technology environment throughout the middle and back office functions. In addition to the technical leadership, Stan ensures the appropriately controlled environment thru governance, development of standards and policies,, resource allocation, expense optimization, data and application management. Prior to CIT, Stan was in the Advisory Consulting practice of PricewaterhouseCoopers (PwC) partnering with clients across industries on regulatory response, data management, and process transformation initiatives.

Stan is a 2012 graduate from Harvard Extension School. He completed his undergraduate at The College of New Jersey (TCNJ) graduating with honors with a major in Computer Science and a minor in Marketing. He currently is a member of the 'Big Data Advisory Council' at Rutgers University helping to shape curriculum and certificate programs around Big Data to ensure alignment between academia and industry. He has also recently joined the Board of Directors of a non-profit organization whose mission is to promote Science, Technology, Engineering and Math (STEM) among underserved youth through a variety of targeted programs.

Stan lives in New Jersey with his wife Caitlin and their three sons and two dogs. Stan has volunteered to serve as the Director of Governance and leverage his expertise and experience around developing, implementing, communicating and maintaining governance, risk and compliance policies, processes and procedures. Stan looks forward to the opportunity to serve the board and the broader organization in this role and greatly appreciates your consideration.
